1. Projects (Main Dashboard):

Project Charter/Initiation:

- Add a "+ Create New Project" button or link.
- When clicked, display a modal or a form within the page to capture project charter information (project name, description, goals, stakeholders, etc.).

Scope Management (High-Level):

- Within the project summaries displayed on the dashboard, include a concise section for "Project Scope" or "Key Deliverables."
- This provides a quick overview without overwhelming the user.

2. Project Details (Sub-Page of Projects):

• Scope Management (Detailed):

- Add a "Scope" tab or section within the "Project Details" sub-page.
- Here, include:
 - A text editor or structured form to define the project scope.
 - A section for "Requirements Gathering" with input fields or links to relevant documents.
 - A "Work Breakdown Structure (WBS)" section, potentially using a hierarchical list or interactive diagram.
 - A section for scope validation and control, with approval workflows, and change requests.

Resource Management (Planning):

- Add a "Resources" tab or section within the "Project Details" sub-page.
- Include fields to define project roles, required skills, and initial resource availability.

• Stakeholder Management:

• This is already included in the project details page.

• Project Closure:

- Add a "Project Closure" tab or section to the "Project Details" sub-page.
- This section can include a checklist for project closure tasks and a "Final Sign-off" form.

3. Tasks:

Resource Management (Assignment):

- When assigning tasks, include a field to specify the required resources (people, equipment, etc.).
- Display resource availability and allocation within the task view.

•

Risk Management (Task-Specific):

- Add a "Risks" section to each task view.
- Allow users to identify and track risks associated with individual tasks.

4. Project Plan:

Resource Management (Scheduling):

- Integrate resource allocation into the Gantt chart or calendar view.
- Display resource availability and potential conflicts.

• Risk Management (Timeline):

- Visualize project risks on the Gantt chart or calendar view.
- Show potential impact on project timelines.

5. Communications:

• Risk Management (Communication):

- Add a "Risk Communication" channel or section to the communications page.
- Allow users to share risk-related information and updates.

6. Transactions/Budget:

Procurement Management (Financial):

- Integrate procurement-related financial transactions into the budget/transactions page.
- Track purchase orders, invoices, and payments related to procurement.
